Annual Vegetation Management Program on CN Railway corridors

Davey Tree Expert Company of Canada Ltd. will apply herbicides on the CN railway network in Quebec using spray trucks and a spray train. Each year, CN is required to manage vegetation on its right-of-way. Managing vegetation contributes to mitigating fire risks and enhance the efficacy of inspection of track infrastructure. CN adheres to requirements as per the Rules Respecting Track Safety, adopted under the Railway Safety Act (RSA). Part II of the Rules require; “vegetation on railway property, which is on or immediately adjacent to roadbed must be controlled.” The spray application will be performed by certified applicators and in conformity with current federal and provincial regulations. The products that may be used for weeds and brush control include:

Herbicide Name	PCP Number	Herbicide Name	PCP Number
Arsenal PowerLine	30203	Hasten (Adjuvant)	31760

The product or combination of products used, will vary depending on province and location. Rates will adhere to the approved label rates of each product. There will be one application of herbicides to treat the Ballast section of the track bed. These products bind tightly to the soil, restricting their movement from the site of application and are approved by Health Canada and are safe for use when used in accordance with label directions. All product requirements for setbacks in the vicinity of dwellings, aquatic environments and municipal water supplies will be met. This program will take place from **May 1 to October 30th**. **Do not harvest or eat any vegetation from along the rail corridor, this area has been treated with herbicides and is also private property where trespassing is prohibited.**
