Our operations support over 260 jobs in the state and add \$40M to Pennsylvania's GDP*

CN owns and operates a fully integrated supply chain that transports iron ore directly from mines to mills entirely with CN ships and trains.

CN's main line runs from our marine bulk facilities in Conneaut, OH, on Lake Erie, where our Great Lakes ships unload iron ore. Our trains then move the iron ore to steel plants in the Pittsburgh area.

In 2021, CN received a grant from the Pennsylvania Department of Environmental Protection to help with the purchase of a new innovative Wabtec battery electric locomotive; a step on the journey toward decarbonizing the rail sector. CN is also working with Progress Rail to test 100% renewable fuels in Pennsylvania, an exciting step toward our goal of reducing carbon emissions.

Network Investments

Over the past decade, CN has invested about US\$240 million to build and maintain a safe and efficient network in Pennsylvania and to support our supply chain partners. The program focused on maintenance of Great Lakes Fleet vessels, the replacement of rail and ties, plus maintenance of bridges, crossings, culverts, signal systems, and other track infrastructure.

Community Investments

In 2025, CN contributed to several Pennsylvania-based organizations, including:

GREENVILLE FIRE DEPARTMENT CN provided funding for new 800 MHz radios for the Greenville Fire Department, helping improve emergency communications and strengthen response capabilities for residents of Greenville Borough and surrounding communities.

TRANSFER VOLUNTEER FIRE DEPARTMENT CN supported the refurbishment of an engine truck for the Transfer Volunteer Fire Department, helping enhance EMS, rescue, and firefighting services across Mercer, Crawford, and Trumbull counties.
